## Research

*Ruth Ann Vleugels* 12/14 – Present  
*Children's Hospital Boston, Department of Immunology, Division of Dermatology*

- Clinical epidemiology of amyopathic dermatomyositis in the pediatric population: conducting a retrospective analysis of amyopathic dermatomyositis in children at a tertiary care center. Data is being collected on patient demographics, clinical findings, associations, treatments utilized, clinical responses, and disease course. Will be submitted as a first author publication.

*Ruth Ann Vleugels* 11/14 – 06/15  
*Brigham and Women's Hospital, Massachusetts General Hospital, and New York University Hospital, Departments of Dermatology*

- Epidemiology of linear morphea presenting in adult patients: Conducting a retrospective analysis of linear morphea presenting on either the face or an extremity first arising in adult patients in three tertiary care centers. Data on patient demographics, associations, sequelae, treatments utilized, and clinical response to therapy to be submitted to the Society of Investigative Dermatology annual meeting. Was also accepted as a first author publication in *J Amer Acad Dermatol*.

*Ruth Ann Vleugels* 08/14 – 05/15  
*Brigham and Women's Hospital, Massachusetts General Hospital, and New York University Hospital, Departments of Dermatology*

- Clinical epidemiology of eosinophilic fasciitis: Led a retrospective analysis of eosinophilic fasciitis (EF) patients in three tertiary care centers, resulting in the largest existing series of patients with EF. Data on patient demographics, history of misdiagnoses, associations, treatments utilized, and clinical responses to treatment presented at national Rheumatologic Dermatology Society meeting and resulted in a first author publication in *JAMA Dermatol*. Also actively collecting blood samples from patients with EF for clinical research studies.

*Daniel Siegel & Orit Markowitz* 09/11 – 06/14  
*Brooklyn Veteran Affairs Hospital, Department of Dermatology*

- Evaluated the necessary training required to attain meaningful sensitivity and specificity to diagnose basal cell carcinoma in the clinical setting using Optical Coherence Tomography that was presented at the Winter Clinical Dermatology Meeting.

Wei-Li Lee

09/12 – 9/13

State University of New York, Department of Dermatology

- Evaluation of neuronal irritancy dose response potential to phenoxyethanol in ethnic Chinese populations.

Alan Menter

05/10 – 05/11

Baylor University Medical Center, Department of Dermatology

- Observational study of the prevalence of Dupuytren's contracture in psoriasis patients with findings published in *Clinical and Experimental Dermatology*.

Clay J. Cockerell

05/07 – 06/10

University of Texas Southwestern, Department of Dermatopathology

- Responsible for various clinical research projects, case reports, and book chapters that resulted in several first author publications.
